### Description

The unique Air Tow Flatbed uses a totally different concept to make loading easier and safer. The trailer deck remains completely level as it raises and lowers hydraulically in less than 30 seconds. Air Tow adds the advantage of making loading a one man job even in adverse weather conditions and eliminates the need for ramps or a tilt deck. At ground level you simply drive your equipment onto the trailer. Ground level loading is especially useful for equipment with poor traction or low ground clearance. Common uses for the S8-35 trailer include scissor lifts, sweepers, motorcycles, etc.
